

## Community Energy Fortnight

### Community Spaces

We've been supporting community spaces to realise their ambitions to improve the resilience of the building they run. Our regional National Lottery Community Fund partnership helped us support organisations with advice and information and with capital funding to help develop their community spaces.

We helped organisations access capital funding for solar panels, new boilers, repair and replacement of roofs and with insulation. We've also been helping them access funding for in-depth feasibility studies and with legal advice to tackle some thorny legal problems.

Where we couldn't support organisations with direct partnership funding, we've helped identify other resources and funding and looked at how they can prepare themselves to be ready for capital funding.
